DOWN RIGGING STANDARD
IATSE Local 470

In an effort to reduce confusion and in order to provide a safer work environment the standard for down rigging has been adopted.

Qualifications:

Must demonstrate ability to lift seventy-five pounds.
Must demonstrate ability to tie appropriate knots.
Must have basic knowledge of rigging.
Must subscribe to local rigging conditions.
Must have a working knowledge of rigging terms.

Local conditions: (no exceptions)

Arena rigging:

Minimum 10-foot stinger on all points above the net.
Minimum size of a bowline is zero on any point above net. Exception: Split baskets half the length of the working leg.
All stingers will have a shackle bell up.
No motor chain will ever be set up with out a stinger.
All basket hitches will be tied in on the pin side of the drop shackle with out capturing the working shackle.
Any links taken out of a deck chain shall be on the up side of the bridle.
Burlap is to be sent up with every point unless told otherwise.
